

# H3 LOSP Treated & Primed Finger Jointed Hoop Pine Chamferboard

Produced locally with pine sourced from sustainably managed forest plantations in Queensland

**77 x 19**

Treated hoop pine has been relied on for generations to provide dependable protection against termites & decay. It's not only treated hoop pines ability to extend the life of your structure, but people's preference for a timber look, that has made treated pine the most commonly used timber product on the Australian market.

**128 x 21**

Prior to priming these Finger Jointed Hoop Pine Chamfer Boards have been impregnated with a H3 class LOSP preservation treatment. This application increases the pine boards durability for outside, above ground (exposed to weather) projects & is designed to prevent the onset of rot as well as protect your structure from insect attacks.

**146 x 21**

**178 x 21**
