## Technical Details

Depth	Thickness	Pieces/Pack	Length
100mm	36mm	90	6m
150mm	36mm	63	6m
200mm	36mm	45	6m
240mm	36mm	36	6m
300mm	36mm	27	6m

Consult your local technical representative for further details

SmartEdge is a lightweight laminated veneer lumber, engineered wood product utilised in concrete construction applications.

The cross lamination of the layered veneers provides a protective mechanism preventing an active capillary effect on the inside wall reducing the effects of cupping.

Produced from sustainable timber, and harvested from certified plantations, SmartEdge is not only a straight and true, uniformly consistent edging, it is also an environmentally friendly composite timber product.
